ANNEX C1

POINT OF INTERCONNECTION

Index

INDEX	2
1 GENERAL	3
2 POINTS OF INTERCONNECTION.....	4
3 ORDERING	5
4 CHARGES FOR POINTS OF INTERCONNECTION.....	6

1 General

1.1 This Annex sets out the Points of Interconnection of the Oman Mobile network.

2 Points of Interconnection

2.1 Oman Mobile Gateway Mobile switches

2.2 Oman Mobile offers the establishment of Points of Interconnection at each of the Interconnection switches set out in Table 1 below, each of which allows the set-up of Mobile to Mobile calls.

Table 1

No	Interconnection Switches
1	GMSC1(Ghala)
2	GMSC2(Qurum)

Signaling

2.3 The parties shall use the signaling protocol Signaling System No.7 for the purposes of interconnection between their networks , in accordance with relevant ITU-T and ETSI standards and recommendations Oman Mobile signaling system is based on ITU-T White Book and ETSI Version2.

2.4 Oman Mobile will provide signaling at each of the points of interconnections and this will be for the time being based on the associated mode.

2.5 Oman Mobile plan to provide signaling interconnection by the use of Signaling Transfer Points (STP) in the near future at the point of interconnections as shown in table 2.

Table 2

No	Interconnection STPs (Mobile)
1	STP1(Ghala)
2	STP2(Qurum)

3 Ordering

3.1 Ordering procedures for the establishment of Points of Interconnection are in Annex H.

4 Charges for Points of Interconnection

- 4.1 Oman Mobile shall charge the amount of OMR 3.500 for the establishment of a Point of Interconnection.
- 4.2 To maintain a Point of Interconnection, the charge is OMR 700 per year.
