3 CONVEYANCE CHARGES.....	5
4 ROUTING REGIMES.....	7

1 General

- 1.1 This Sub-Annex sets out the definitions and prices for the termination service of the Oman Mobile network.

2 Definition of Mobile Termination Service

Call termination mobile segment

- 2.1 A Voice Call handed over from the Operator System to the Oman Mobile System, initially switched by an Oman Mobile Switching Centre for delivery to an Oman Mobile Network Termination Point anywhere in the country of Oman.

SMS termination

- 2.2 A Short Message Service (SMS) message handed over from the Operator System to the Oman Mobile System for delivery to an Oman Mobile Network Termination Point anywhere in the country of Oman.

MMS termination

- 2.3 A Multi mode Message Service (MMS) message handed over from the Operator System to the Oman Mobile System for delivery to an Oman Mobile Network Termination Point anywhere in Oman.

GPRS Session

- 2.4 General Packet Radio System session initiated by a user in the Operator's network communicating with a node in the Oman Mobile System anywhere in Oman.

3 Conveyance Charges

3.1 The prices indicated are 24 hour average price. Oman Mobile will from time to time change this principle due to changes in the calculation methodology and may introduce peak and off-peak rates as well as an introduction of call set up fees in addition to the minute fees.

Service	Price per minute (Baiza per minute)
Call Termination Mobile Segment	15

3.2 SMS prices specified are per SMS sent to the Oman Mobile network or through the Oman Mobile network to international terminal points.

Oman Mobile may from time to time change this principle due to changes in the calculation methodology and may introduce other charging models.

Service	Price per SMS (Baiza per minute)
SMS message termination	0.3

3.3 MMS prices specified are per MMS sent to the Oman Mobile network or through the Oman Mobile network to international terminal points. The prices are “retail minus”. In the table below the reduction counted as a percentage of the retail price is stated.

3.4 Oman Mobile may from time to time change this principle due to changes in the calculation methodology and may introduce other charging models.

Service	Retail discount (%)
MMS message termination	15

3.5 GPRS sessions specified are per GPRS session and counted in Kbytes. The pricing methodology is retail minus and the table below states the reduction in the retail price per Kbyte that is transformed to or from the user in the Operator network.

3.6 Oman Mobile may, form time to time, change this principle due to changes in the calculation methodology or billing methodology and introduce other charging models.

Service	Retail discount (%)
GPRS session	15.00

4 Routing Regimes

To mobile terminal points

- 4.1 Calls handed over from the Operator System to the Oman Mobile System designated to be terminated at a Mobile Network terminal point in the Oman Mobile Network shall be handed over at the POI closest to where the call is originated.
- 4.2 SMS messages handed over from the Operator System to the Oman Mobile System designated to be terminated at a Mobile Network terminal point in the Oman Mobile Network shall be handed over at POI.
