ANNEX C13

IMPLEMENTATION OF NUMBER RANGES

Index

INDEX	2
1 GENERAL	3
2 OMAN MOBILE SERVICES FOR NUMBER IMPLEMENTATION	4
3 SPECIFIC CONDITIONS CONNECTED TO TYPE OF NUMBER RESOURCE.....	5
4 PRICES AND DELIVERY TIMES	6

1 General

- 1.1 Oman Mobile delivers services to implement numbers in the Oman Mobile Network. The services are charged and delivered according to the conditions stated in this Sub-Annex C13.
- 1.2 Oman Mobile will only accept orders concerning number ranges that are allocated to the requesting Operator, according to the National Numbering Plan published by the TRA.

2 Oman Mobile services for number implementation

- 2.1 Oman Mobile implements number resources, which will make them available for subscribers directly connected to the Oman Mobile Network.
- 2.2 The Number implementation service is supplied as two different types:
 - 2.2.1 Oman Mobile Number Implementation in a defined time frame
 - 2.2.2 Oman Mobile Number Implementation at a specific time
- 2.3 Number implementation means implementing of new number resources in the Oman Mobile Network and changing or disconnecting existing Number resources in the Oman Mobile Network.

Oman Mobile Number Implementation in a defined time frame.

- 2.4 The service is used when implementation of Number resources are not time-critical. The implementation will be performed at a time chosen as suitable to Oman Mobile within the agreed time frame, the maximum delivery time.

Oman Mobile Number implementation at a specific time.

- 2.5 The service is used when the implementation of the Number resources is to be performed on a specific date. This service makes it possible to implement Number resources with minimal disturbance of the customer base.

3 Specific conditions connected to type of Number resource

Geographical number series

- 3.1 Implementation is performed with an analysis corresponding to the number of digits which the number range has according to the Numbering Plan published by the TRA.

Non-geographical numbers

Type of number	Charging principle
Toll-free number	Reverse termination
Mobile phone numbers (MSISDN)	Termination
Premium rate numbers	Termination

- 3.2 Implementation is performed with an analysis in the Oman Mobile system corresponding to the number of digits which the number range have according to the by TRA published number plan.

Numbers for testing purposes

- 3.3 The Operator shall supply Oman Mobile with one (1) number for testing purposes. At that number there shall be an automatic answer stating that the call is delivered to the Operator's network and stating the Operator's name. The number for testing purpose is to be permanent.

4 Prices and delivery times

Oman Mobile Number implementation within time frame.

- 4.1 The price given below in 4.3 comprises implementation of one or many single numbers or number ranges which are geographical or non-geographical.
